

Automated Testing with Selenium

Selenium:

Selenium is an open-source tool implemented in the automation of web browsers. It works by enabling you to write scripts of interaction with web elements, emulating user actions, or running tests on web applications. Its major area of application is in testing and automating web applications

Test Scenario Identification

1. Verify login functionality with both valid and invalid credentials
Automate the login authentication into Trello Website
2. Verify the creation of new boards, lists, and cards.
Automate creation of new board, new list and new card after login
3. Verify drag-and-drop functionality for moving cards between lists.
Automate the movement of moving a card from one list to another
4. Verify that specific elements (like buttons, links, and input fields) are correctly displayed on the dashboard
Automate navigation to main dashboard and identify and verify specific elements are displayed in the respective dashboard.
5. Verify proper functionality of filtering, labeling, and search features
Automate testing functionality of filtering using labels, labelling using custom labels to different cards and search using keyword in main search bar.

Test Script Creation

Software Used : VS Code

Language : Python

Browser: Chrome

Libraries: coverage, pytest, pytest-cov, pytest-html, pytest-metadata, pytest-dotenv,webdriven-manager

Reporting

report.html

Report generated on 02-Nov-2024 at 23:11:09 by [pytest.html](#) v4.1.1

Environment

Python	3.13.0
Platform	Windows-11-10.0.22631-SP0
Packages	<ul style="list-style-type: none">• pytest: 6.3.3• pluggy: 1.5.0
Plugins	<ul style="list-style-type: none">• cov: 6.0.0• html: 4.1.1• metadata: 3.1.1

Summary

9 tests took 00:02:08.

(Un)check the boxes to filter the results.

☐ 0 Failed ☒ 9 Passed ☐ 0 Skipped ☐ 0 Expected failures ☐ 0 Unexpected passes ☐ 0 Errors ☐ 0 Retuns

[Show all details](#) / [Hide all details](#)

Result	Test	Duration	Links
Passed	test_check_elements.py::test_trello_dashboard	00:00:11	
Passed	test_create_board_and_list.py::test_trello_create_board_and_list	00:00:19	
Passed	test_create_card.py::test_trello_create_board_list_and_card	00:00:24	
Passed	test_drag.py::test_drag_and_drop_card	00:00:12	
Passed	test_filter.py::test_filter_by_green_label	00:00:14	
Passed	test_invalid_login.py::test_invalid_password_login	00:00:09	
Passed	test_labelling.py::test_add_green_label_to_card	00:00:16	
Passed	test_login_2.py::test_trello_login	00:00:10	
Passed	test_search.py::test_trello_login_and_search_navigation	00:00:13	

I developed a report using pytest that consolidates and generates a HTML report of all test cases with coverage.

Above report indicates, all functional and non-functional requirements were included in the test scenarios and all the test cases are passed successfully.

Test Execution and Documentation

1.Verify login functionality with both valid and invalid credentials

Automate the login authentication into Trello Website

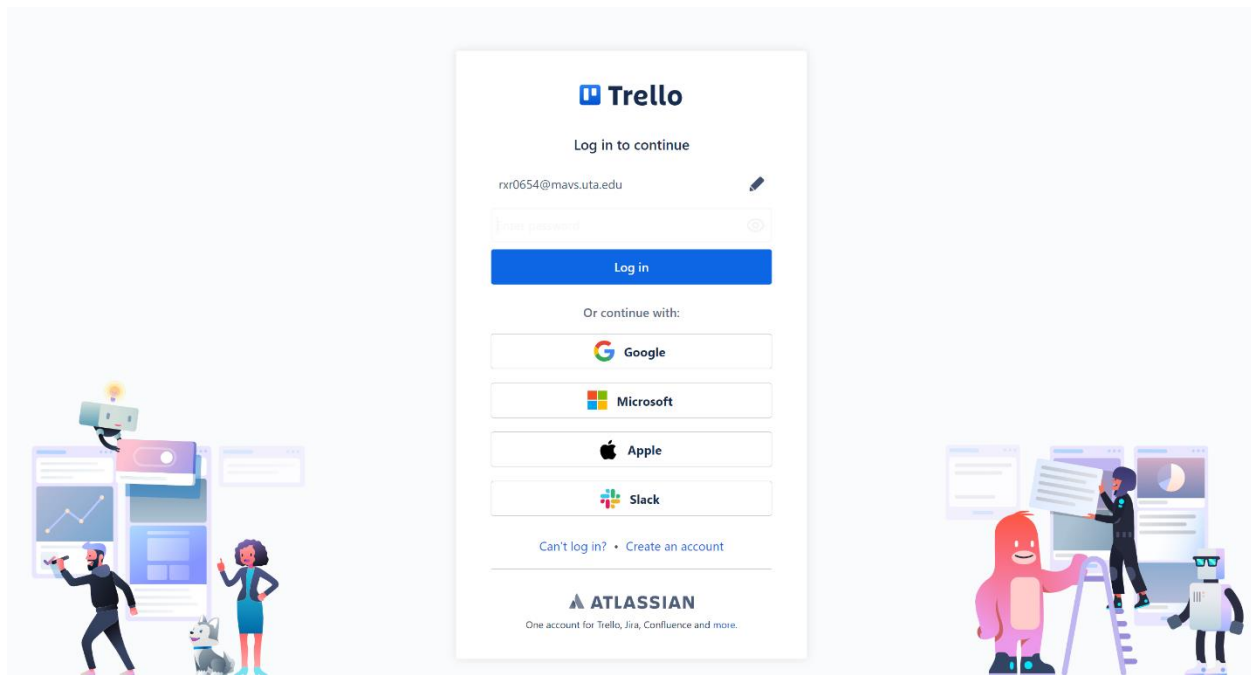

Valid Credentials

Test Data:

Email: rxr0654@mavs.uta.edu

Password: <: My password>

Input Email

The image shows the Trello login interface. At the top, the Trello logo is displayed. Below it, the text "Log in to continue" is shown. The email input field contains the text "rxr0654@mavs.uta.edu". Below the email field is a password field with a placeholder "Enter password" and a toggle icon. A blue "Log in" button is positioned below the password field. Underneath the button, the text "Or continue with:" is followed by four social login options: Google, Microsoft, Apple, and Slack. At the bottom, there is a link "Can't log in?" and a link "Create an account". The Atlassian logo and tagline "One account for Trello, Jira, Confluence and more." are at the very bottom. The background features colorful illustrations of people and a dog interacting with digital screens.

Trello

Log in to continue

rxr0654@mavs.uta.edu

Enter password

Log in

Or continue with:

Google

Microsoft

Apple

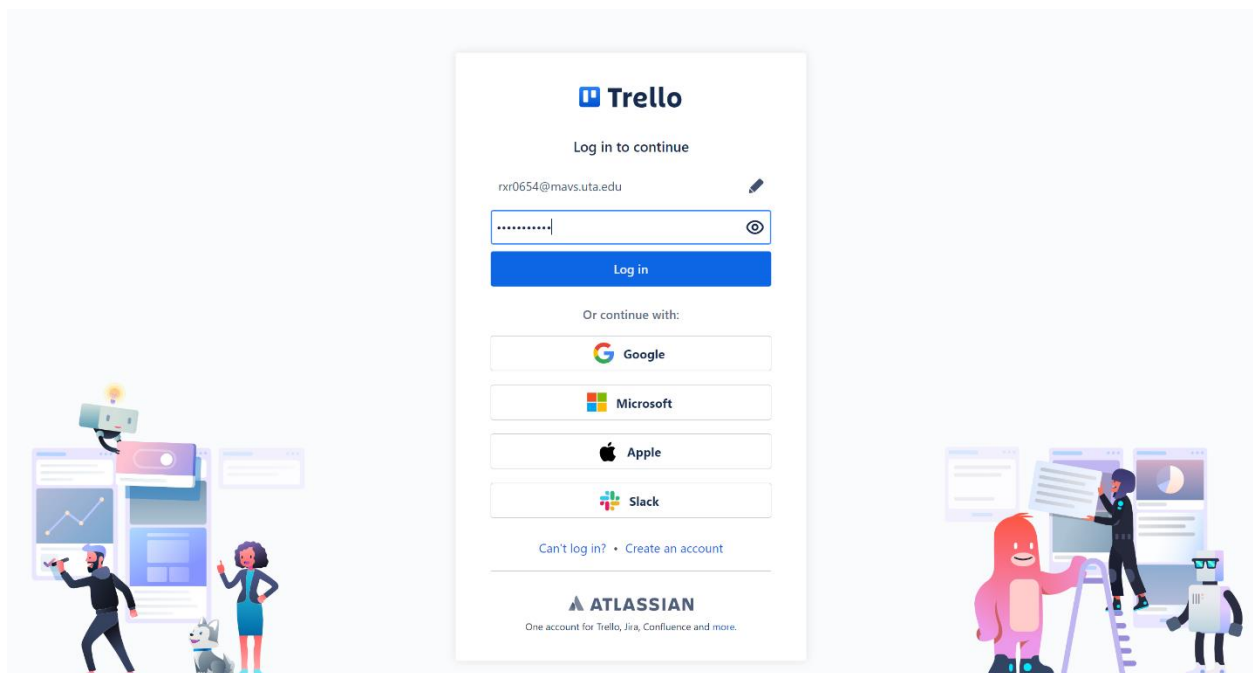

Slack

Can't log in? • Create an account

ATLASSIAN

One account for Trello, Jira, Confluence and more.

Input Password

This image is identical to the one above, showing the Trello login page. The email field still contains "rxr0654@mavs.uta.edu". The password field now contains a series of dots, indicating that a password has been entered. The "Log in" button and the rest of the interface remain the same.

Trello

Log in to continue

rxr0654@mavs.uta.edu

.....

Log in

Or continue with:

Google

Microsoft

Apple

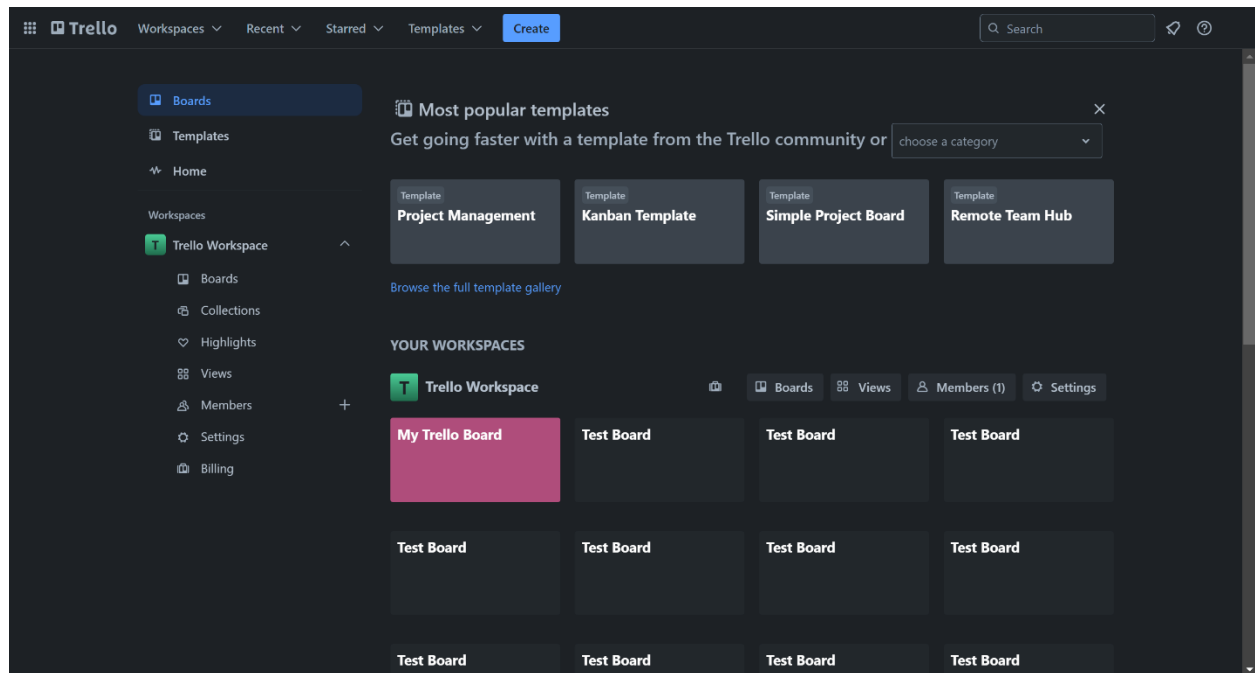

Slack

Can't log in? • Create an account

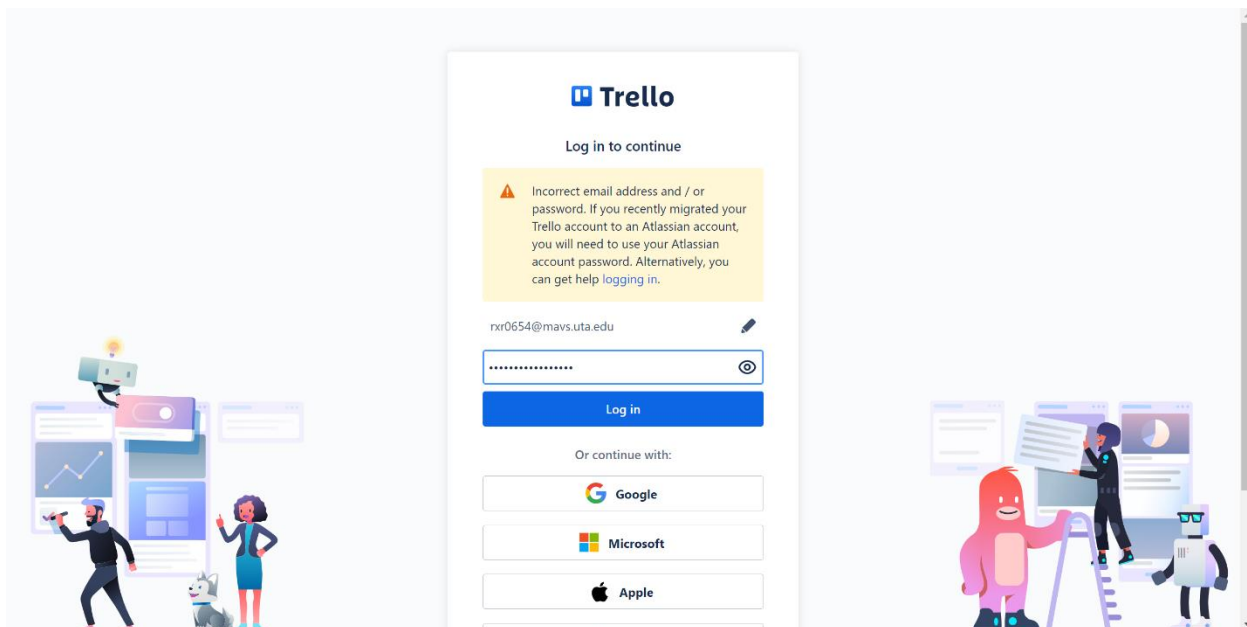

ATLASSIAN

One account for Trello, Jira, Confluence and more.

Login Successful

Invalid Login Credentials

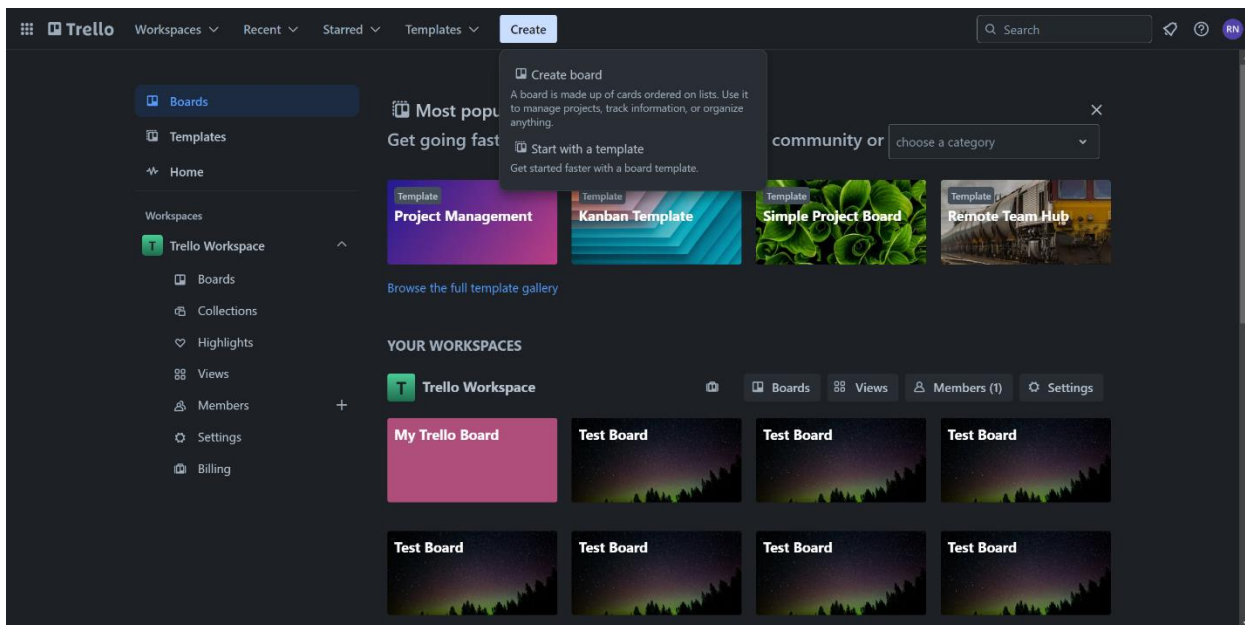

2. Verify the creation of new boards, lists, and cards.

Automate creation of new board, new list and new card after login

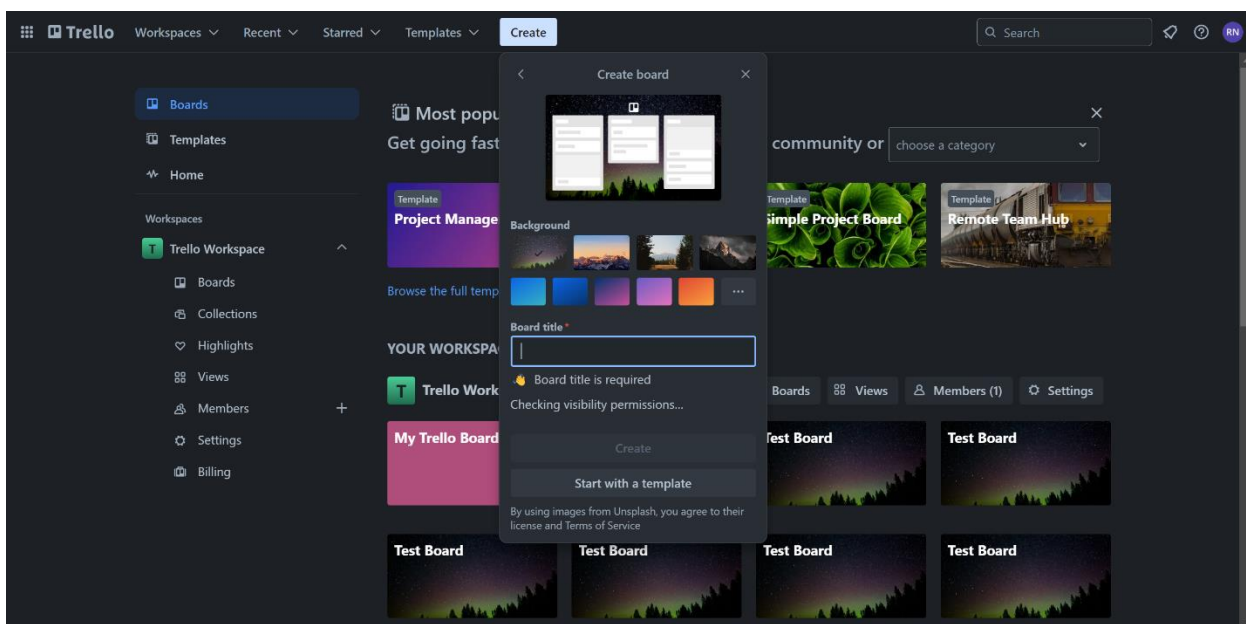

Create Board

Test Data: Test Board for “Board Title”

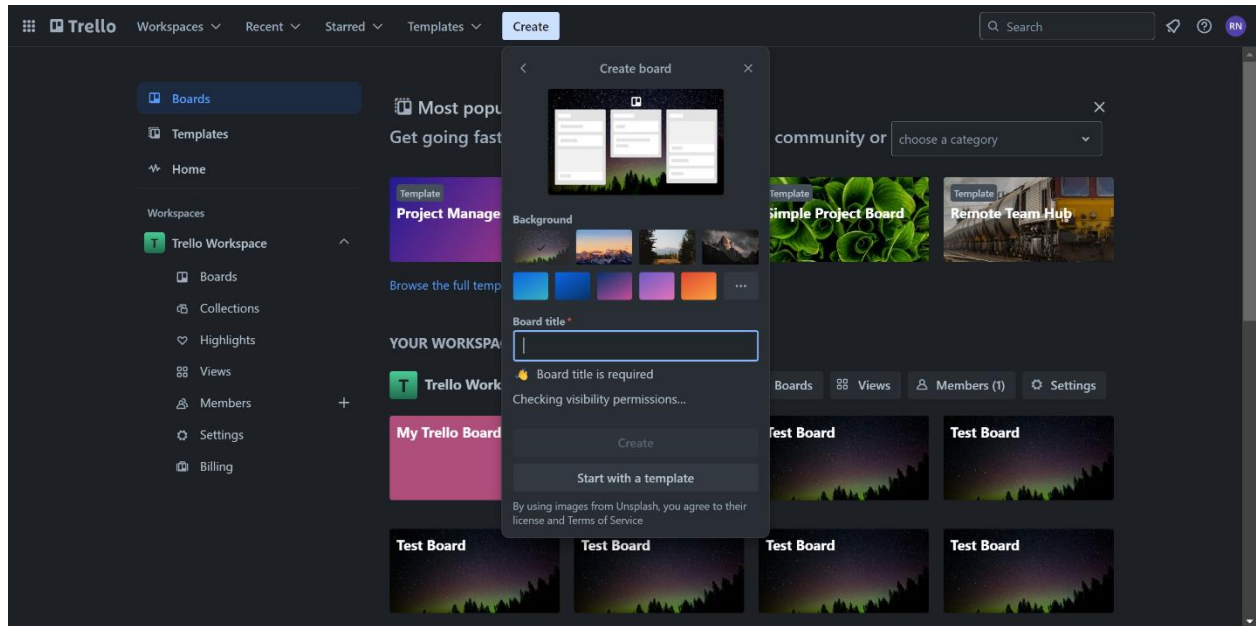

Create Button Clicked

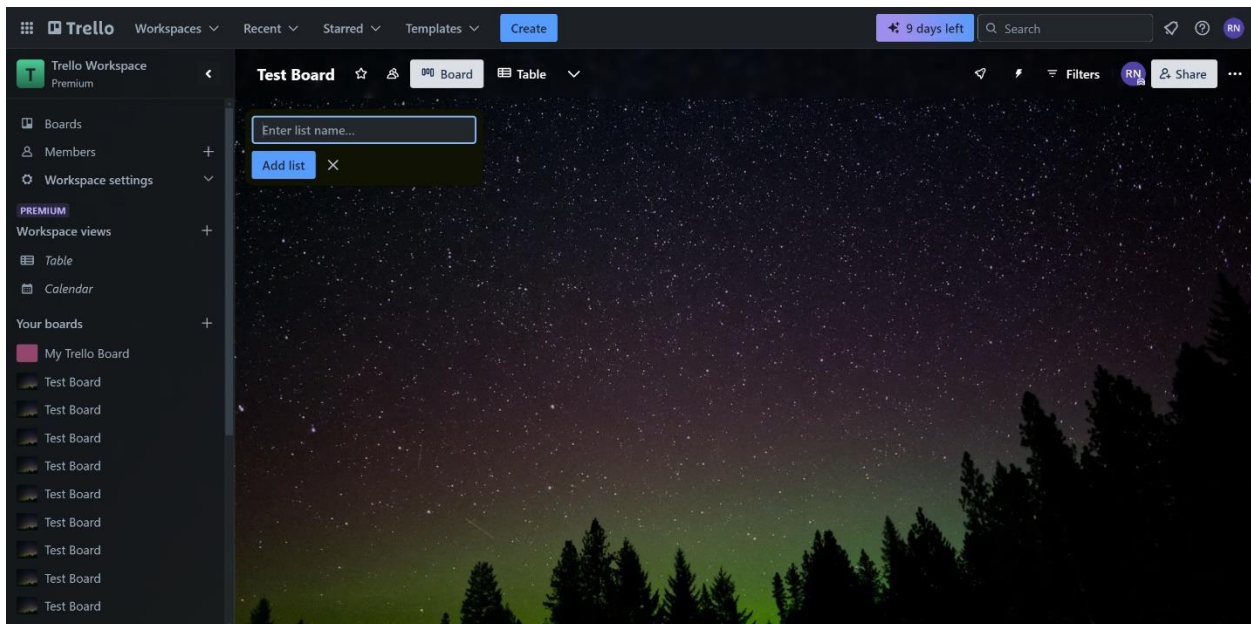

Create Board Button Clicked

Inputting Board Title

Board Created and Verified

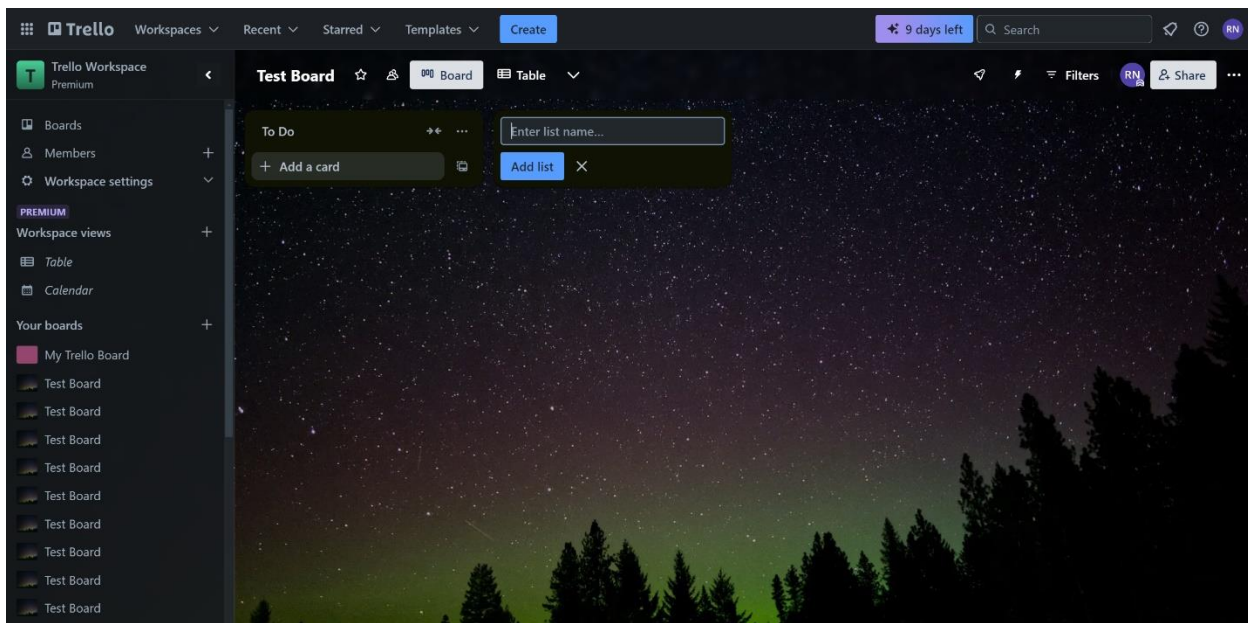

2. Create List

Test Data: Creating a list called 'To Do'

Clicking on add a list

'To Do' List created

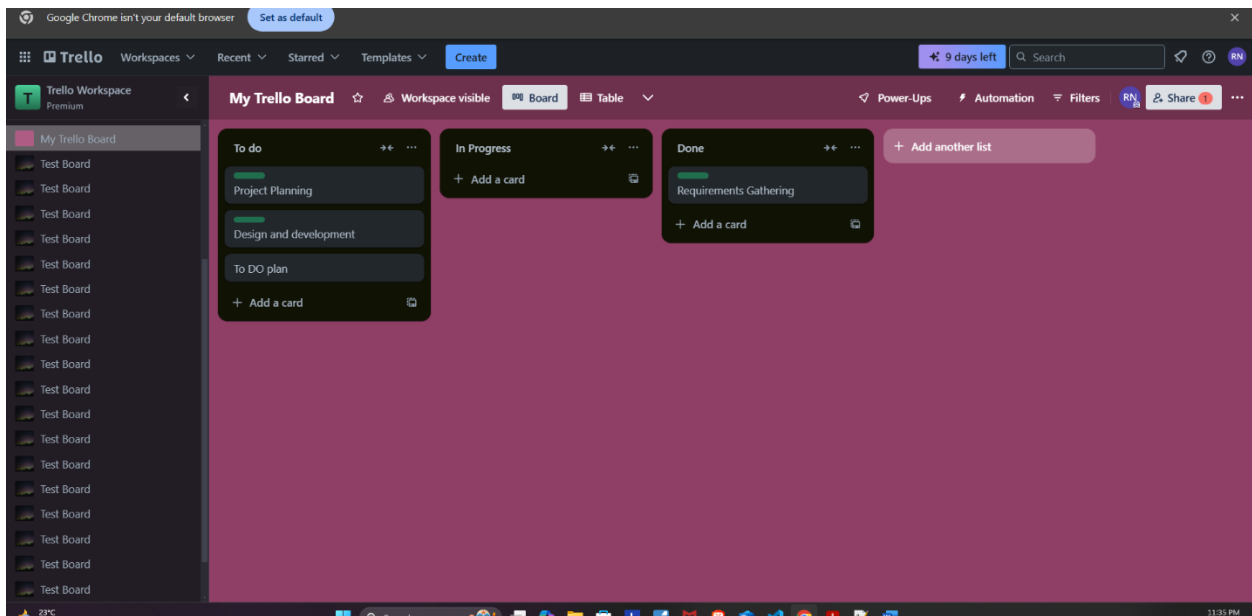

3. Verify drag-and-drop functionality for moving cards between lists.
Automate the movement of moving a card from one list to another

Navigate to this main page 'https://trello.com/b/GH3SE4Yw/my-trello-board'

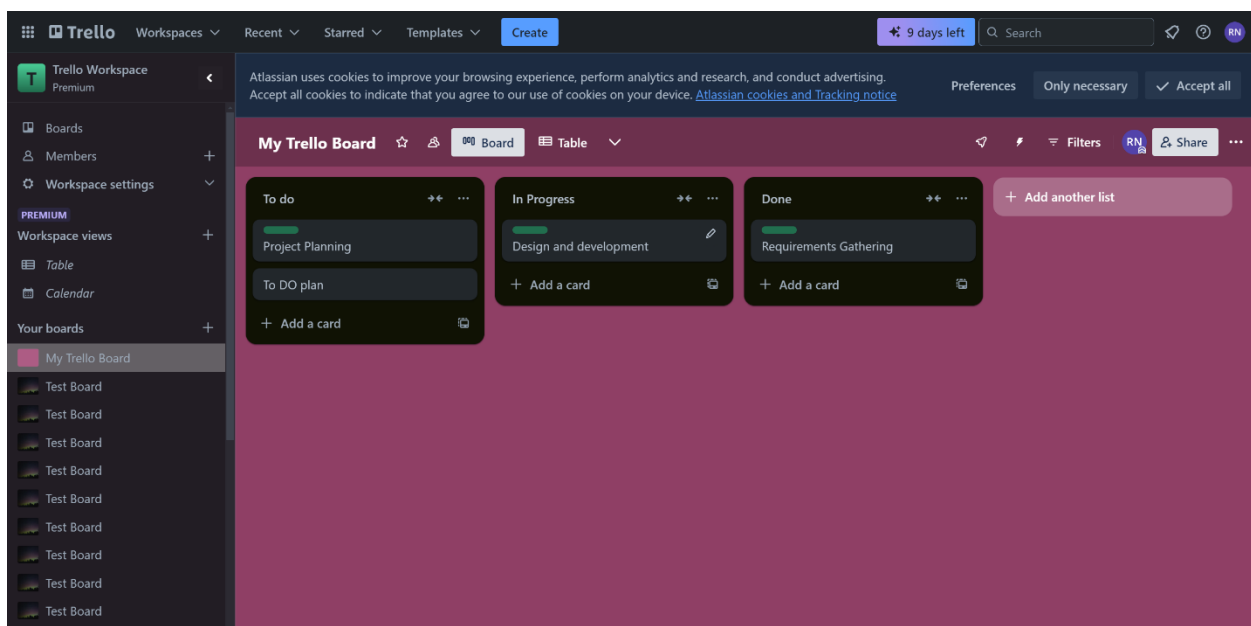

Assuming already logged in, else login functionality included.

Test Case: Drag 'Design and development' from To Do List to In Progress List.

Before Dragging and Dropping

Drag and Drop Success

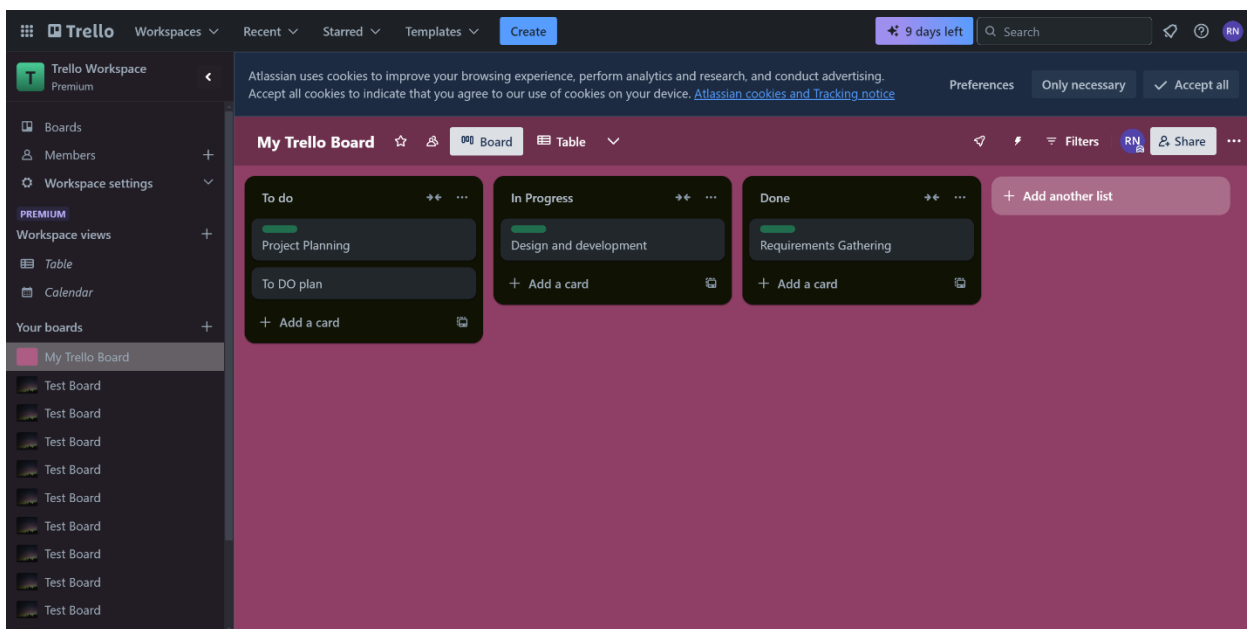

4. Verify that specific elements (like buttons, links, and input fields) are correctly displayed on the dashboard

Automate navigation to main dashboard and identify and verify specific elements are displayed in the respective dashboard.

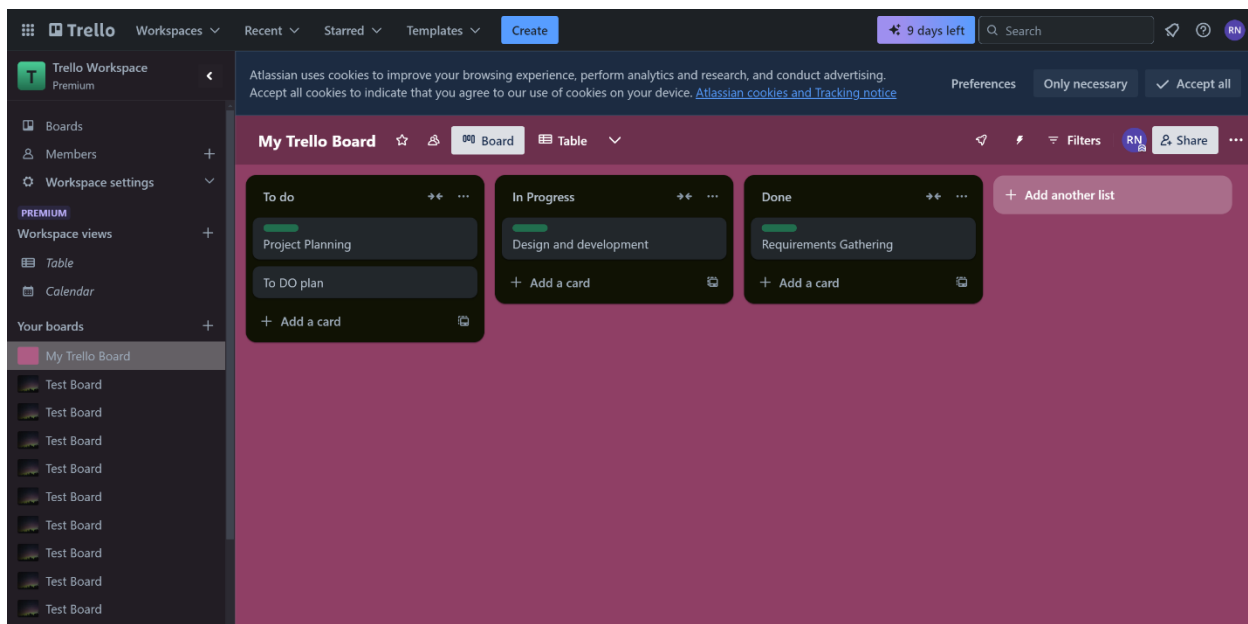

Navigate to this page: <https://trello.com/b/GH3SE4Yw/my-trello-board>

It is assumed the user is logged in; else login functionality is also included.

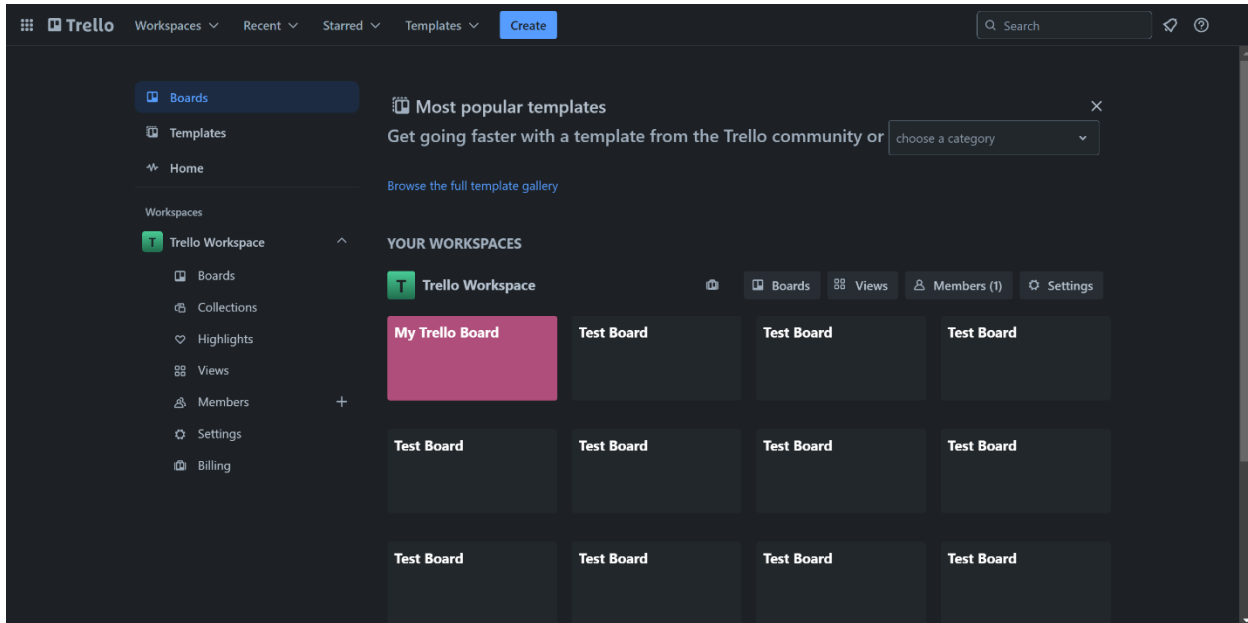

Verify 'add a card' button is visible

Verify 'add another list' button is visible

Verify the search bar is present and can be interacted with

5 Verify proper functionality of filtering, labeling, and search features

Automate testing functionality of filtering using labels, labelling using custom labels to different cards and search using keyword in main search bar.

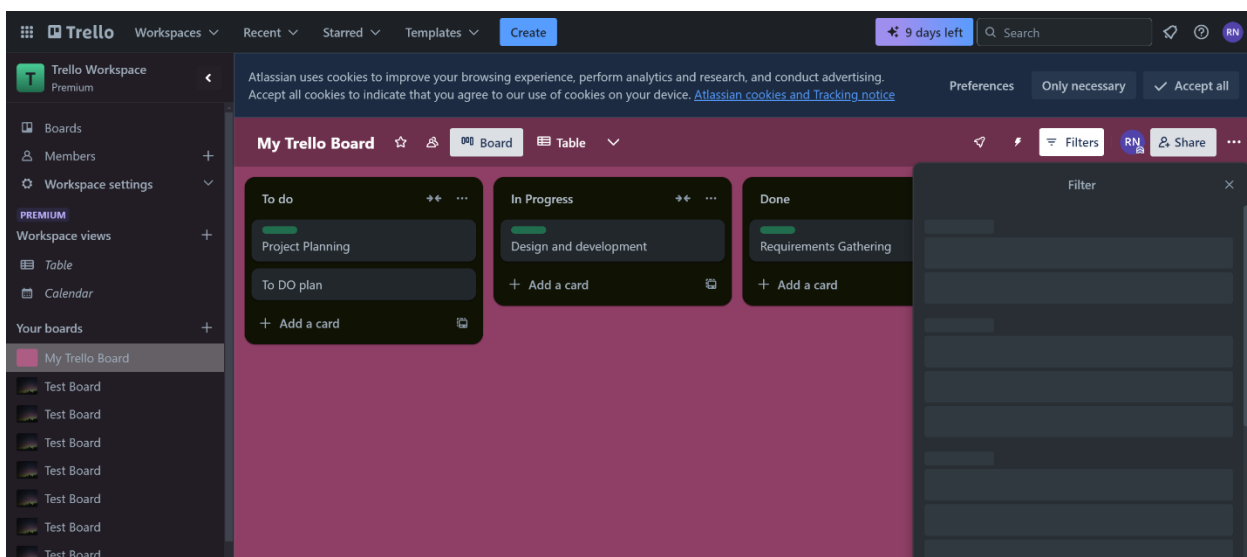

Navigate to the this page: <https://trello.com/b/GH3SE4Yw/my-trello-board>

It is assumed the user is logged in, else login functionality is also included.

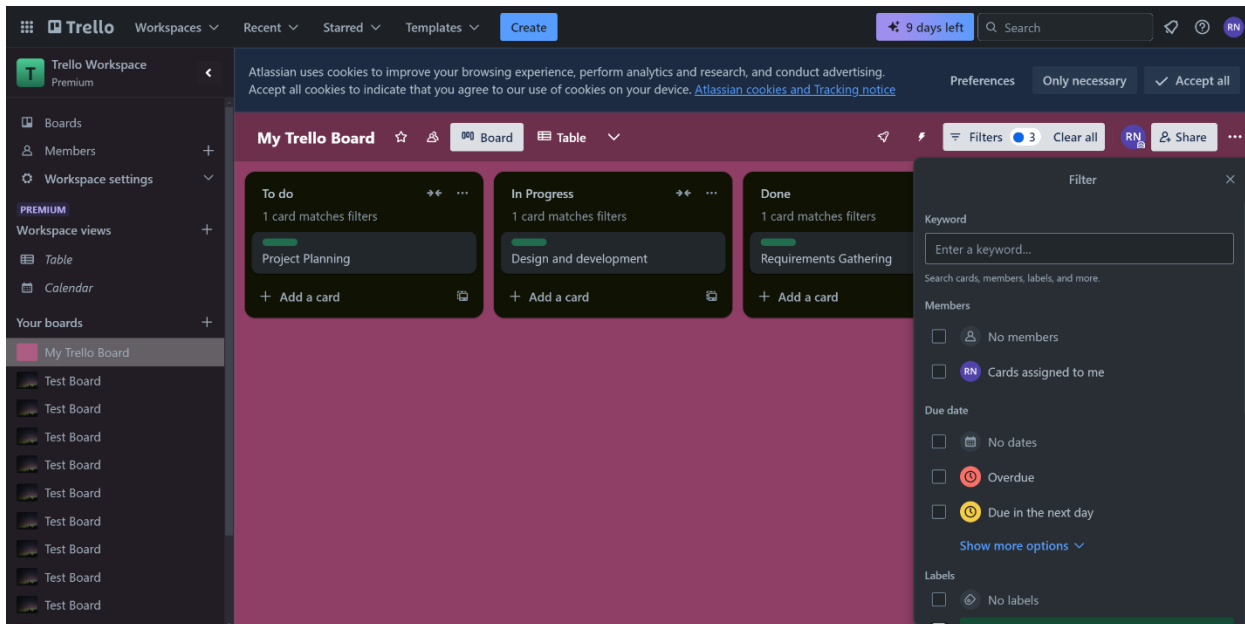

Filter

Test Data: Custom Green label after clicking on Filter button

Clicking on filter button

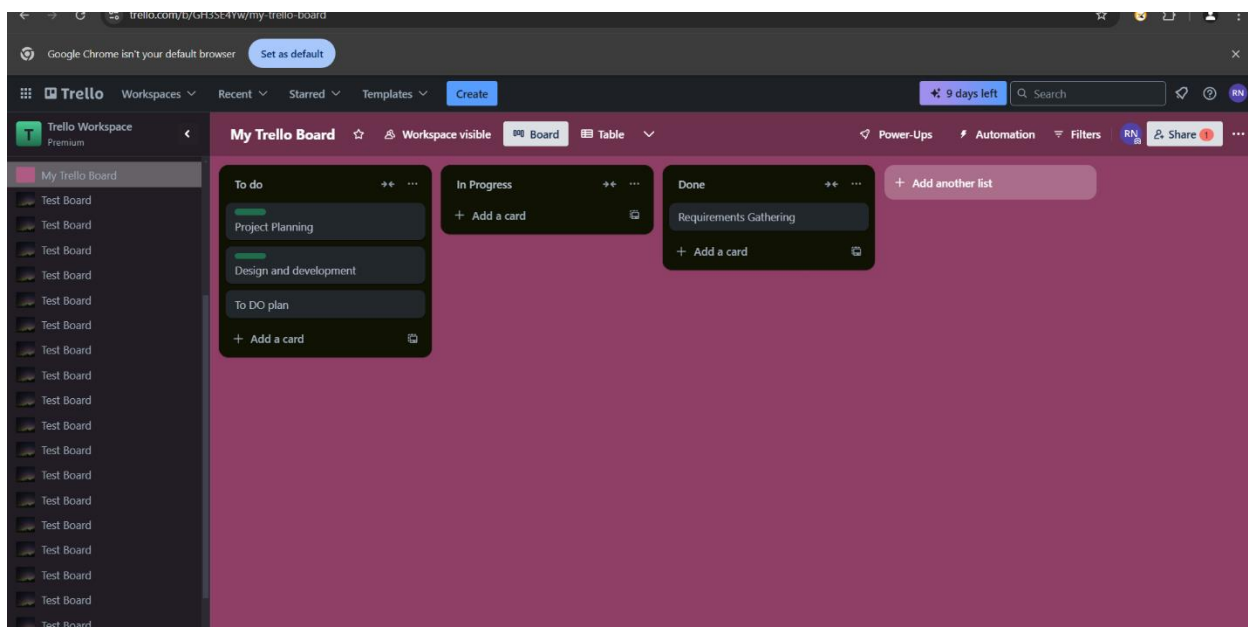

Expanding the drop down and clicking on custom green label, and filtered card displayed.

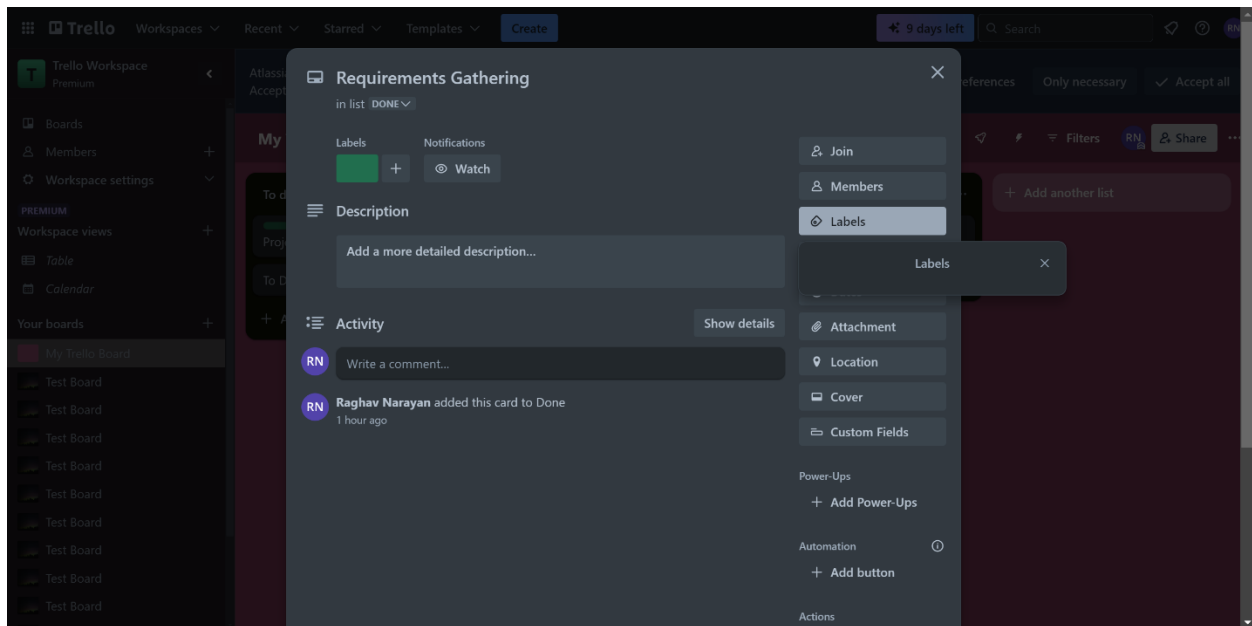

Labelling

Test Data and Scenario: Clicking on 'Requirements Gathering' card and adding a custom green label by navigating the modal component

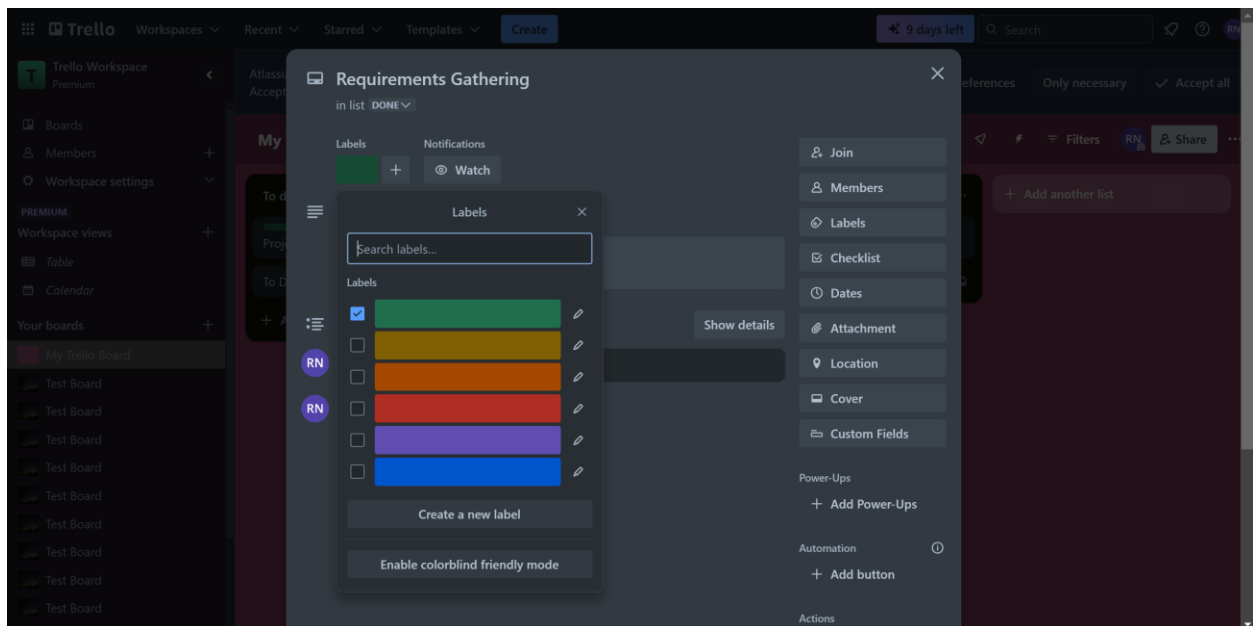

Home Page

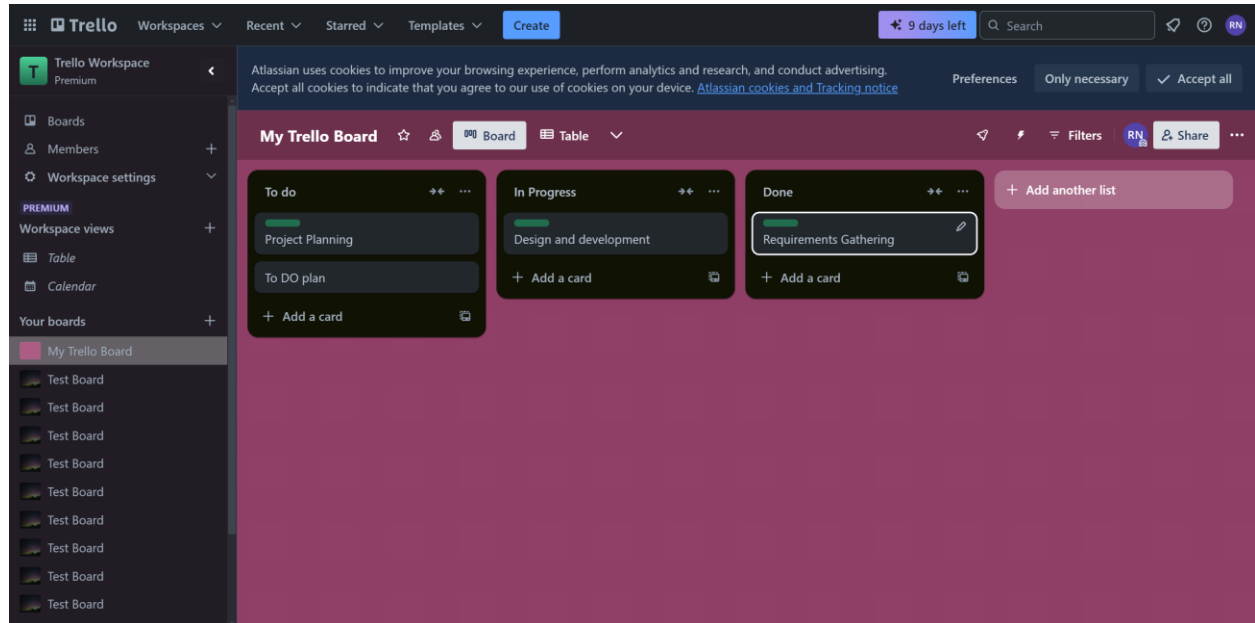

Labels Button Selected

Selecting the Green Label

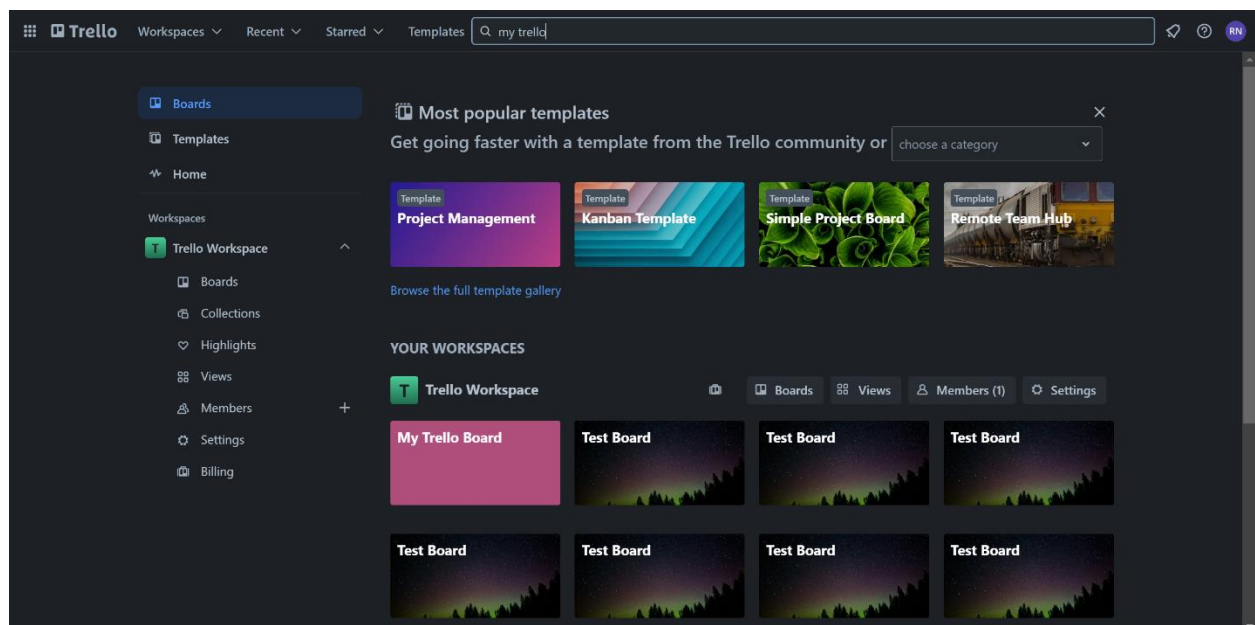

Green Label Verified

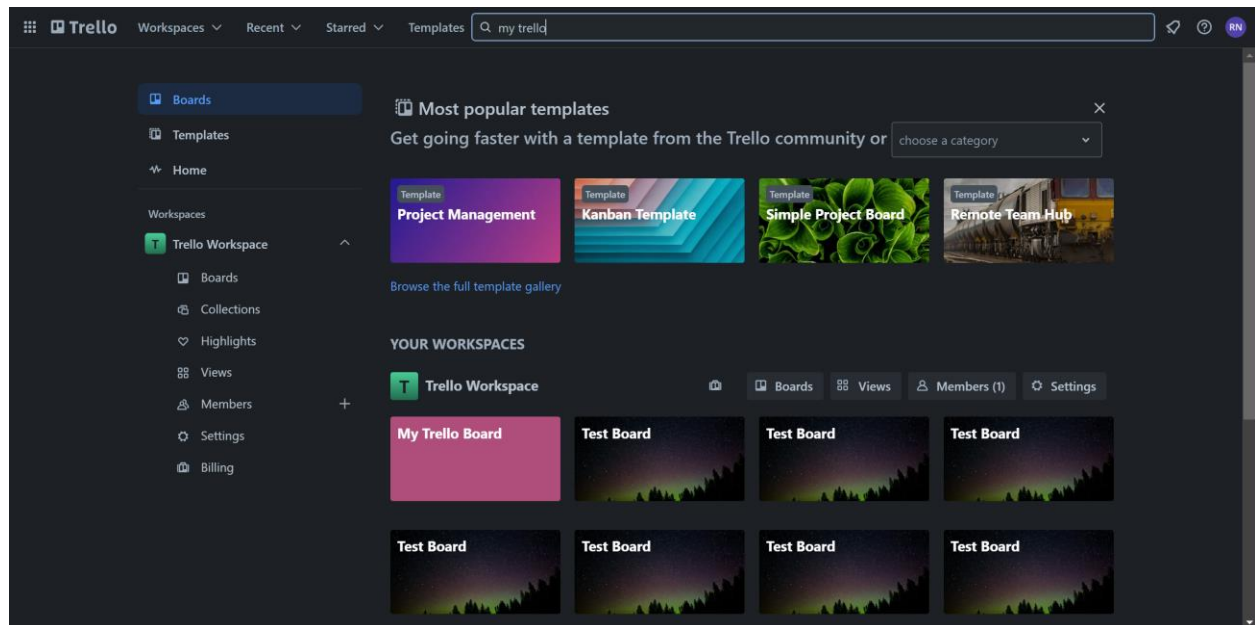

Searching

Test Scenario and Data: Navigating to home page, targeting the search bar and entering input as 'my Trello' to verify if list of boards appear in the workspace

Inputting the Search

Directed to intended workspace board

Note:

Each script includes a screenshot functionality that allows the script to take screenshot of the viewport during each of the main steps in each scenarios. This will be included in the zip folder for reference.

Report. HTML also attached with the zip folder to get a summary of test results all the involved test cases.

Test Suite Coverage Also have been executed and respective test script-wise documentation report stored in respective coverage folder. Will be included in the zip folder.
